2. **Category of Event** : **Demo-workshop**
3. **Day, Date** : **29th January 2017**
4. **Venue** : **Sunshree Society, NIBM Road, Pune**
5. **Organizer's Details** : **NIBM Road Residents Forum (a NGO in Pune)**
6. **Co-sponsor** : **IEEE Pune Section**

7. **Brief Description of Theme (200 words):** After demonetization announced by our Prime Minister on November, 8, 2016, cash transactions are declining. People are resorting to digital transactions, but this is putting certain sections of society at a disadvantage. In particular, senior citizens and housewives who have been used to cash dealings most of the time in their life are finding it difficult to cope with the changing situation. In order to help this group a Demo-Workshop was organized to show how smart mobile phones can be used for financial transactions in day to day life. The Demonstration started with downloading of the Mobile App BHIM (Bharat Interface for Money) developed by National Payments Corporation of India (NPCI), based on the Unified Payment Interface (UPI).

A simple video was used to demonstrate how transactions can be made using the app. There was also a one-to-one interaction with the participants

The demonstration was conducted by Mr. Harshal Girish Narkhade and Mr. Shreyans Sunil Gandhi, IEEE student members from MIT College of Engineering. They were helped by Mr. Rahul of MyFiscus.com. All of them were felicitated by Mr. Subramaniam, Vice-chairperson, NIBM Road Residents Forum.

8. **Speakers: Mr. Harshal Girish Narkhade ; Mr. Shreyans Sunil Gandhi**
9. **Topics covered in short** : **Financial Transactions using Mobile**
10. **Details of Attendees** : **Total = 45 (IEEE Members: 3; Others: 42)**
11. **A few photographs are given below(6):**
